

TOP 100 Law Firm Directories (2016) – Attorney SEO Directories Ultimate List [Chris Dreyer](#) | March 06, 2016

Legal directories offer an extremely easy, effective, and affordable way for attorneys and law firms to advertise on the Internet and promote their brand.

As an attorney, you already realize the importance of promoting your practice to get your website in front of the right crowd. That's where *law firm directories* come in handy!

And guess what? Your audience is already waiting for you – you just have to let them know you exist.

A legal directory specializes in bringing these people to attorneys – like you. Moreover, when other sites link back to yours, you'll improve your Google search engine rankings, which translates in more free residual traffic.

If SEO is important to your practice and law firm, then you need to know that most law directories are FREE to use, while others require a monthly or yearly fee.

Premium law directories usually provide extra exposure on their site and other benefits free members cannot access unless they become paid members.

How is This List Different from Other Law Firm Directories?

Unlike many other websites or blogs ranking / displaying legal directories, our law firm directories list isn't randomly picked, but manually curated. Plus, it is an interactive list – that means you can select directories you want to submit to based by price or niche.

*We listed those sites with the highest domain rating as per [AHREFS](#) at the top because they're more authoritative and getting back-links from them are of greater **SEO** value.*

With more than 100 unique law directories submission links listed, we made sure all inclusions were active and valid at the time of checking them. Please email us to report dead links and we'll replace them at our earliest.

Whether you're a Family Law attorney, Personal Injury lawyer, practice Admiralty and Maritime law, or focus on Consumer Protection issues, most of these directories already have a category just for you, and sometimes more than one.

While the focus is on US law firm directories, we also made sure to mention a few Canada legal directories that we have found online.

This legal directories list will continue to expand as our research continues.

¹ Ahrefs URL Rating (AUR)

Ahrefs URL Rating, a logarithmic scale of 0 to 100 developed by Ahrefs, measures the impact of all backlinks which link to a given URL (or the webpage being qualified). In general, the more backlinks a given URL has itself - the higher AUR score it receives and more link juice it has in backlinking to others. But having one "fat" link can give more "juice" in UR than a hundred of "thin" backlinks.

The AUR score will take into account only links to the homepage itself, while the Ahrefs Domain Rating (ADR) is an average score taking into consideration all URLs (webpages) for the domain being qualified.^{[12][13]}

Ahrefs Domain Rating (ADR) Ahrefs Domain Rating, a logarithmic scale of 0 to 100 developed by Ahrefs, is an averaged evaluation of all webpages (or URLs) of the domain being qualified.

The AUR score will take into account only links to the homepage itself, while the Ahrefs Domain Rating (ADR) is an average score taking into consideration all URLs (webpages) for the domain being qualified.^{[14][15]}
