

Run Your **Best** Firm. Build Your **Best** Life.

Smokeball offers the tools and support to grow your productivity by more than 30%.

Smokeball legal case management software supports a seamless work experience, provides deep insights into the health of your business and gets you back to the practice of law, featuring robust email and document management, automatic time tracking and dozens of features to increase your productivity. Plus, Smokeball integrates with Microsoft Office, LawPay, Zoom, QuickBooks, InfoTrack, LawToolBox, RingCentral and more, so you can continue using the tools you already enjoy.

Streamline Your Legal Document Generation

More than 20,000 automated court-approved forms are included with Smokeball, so you'll always use the most up-to-date version. Enter key matter information once, and every document is automatically populated with the relevant matter details to ensure accuracy.

Automatically Capture Time and Activity

By auto-tracking every minute, your staff spends practicing law, you get back hundreds of hours wasted on time-tracking and you improve invoice accuracy. Understand your profitability per matter and per employee to make better business decisions - no matter how you bill.

Customized for Your Area of Law

Smokeball is built for your practice area so you can take your firm paperless and remain more organized. Highly tailored matter types for Family Law, Personal Injury, Real Estate and more are all included. Smokeball will transform your firm and business.

Seamlessly Manage Your Outlook Email

Every email sent and received relating to a matter is automatically managed in Smokeball. No more manually labeling, organizing and copy/pasting emails—your LPMS takes over that job to eliminate unnecessary tasks and improve your internal and client communication.

Run Your Entire Firm From One Place

Staying on top of your files has never been easier. Share calendars, assign tasks and build workflow processes to ensure your entire team is on the same page. And legal task and workflow features allow you to assign and re-assign tasks so workloads remain balanced.

Access Your Files and Work From Anywhere

Smokeball's hybrid configuration of local installation plus cloud-based storage gives you bank-grade secure access to your data at all times. Whether you're working from home or stuck in a courtroom with a bad internet connection, you'll always have the information you need.

**I wish we would
have been using
Smokeball many,
many years ago.
The program is
ahead of the
game.**
